Summary

Passionate MERN Stack Developer with hands-on experience in building scalable web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in frontend development, backend APIs, and authentication systems with a strong focus on clean and efficient code.

Skills

Frontend Technologies: HTML, CSS, JavaScript, Bootstrap, Tailwind CSS

Backend Technologies: Node.js, Express.js, RESTful APIs, JWT Authentication

Programming Languages: JavaScript, Python

Frameworks/Libraries: React.js

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman

Experience

MERN Stack Developer Intern — ZIDIO

June 2025 – August 2025

- Collaborated with the development team to build and maintain full-stack web applications using the MERN stack.
- Developed responsive user interfaces using React.js, Redux Toolkit, and Tailwind CSS following MVC architecture principles.
- Built backend services using Node.js and Express.js, and developed and tested RESTful APIs using Postman for seamless frontend-backend integration.
- Managed and optimized application data using MongoDB.

Projects

E-Commerce Web Application | MERN Stack (React, Node.js, Express, MongoDB)

July 2025 – August 2025

- Built a full-stack e-commerce platform with JWT authentication, product catalog, search/filter, and cart functionality.
- Integrated Stripe and Razorpay payment gateways and developed an admin dashboard for product and order management.
- Designed RESTful APIs with Express and Mongoose, structuring MongoDB schemas for users, products, orders, and reviews.

Quick.ai – AI SaaS Platform | MERN Stack (React, Node.js, Express, PostgreSQL)

July 2026 – Present

- Built a full-stack AI-powered SaaS platform offering article generation, blog title generation, and AI image tools through a unified dashboard.
- Integrated Google Gemini API for real-time content generation and implemented usage-based rate limiting to enforce free vs. premium access tiers.
- Implemented secure authentication and session management using Clerk, with backend token verification to protect all API routes.
- Designed a PostgreSQL database (hosted on Neon) to persist user-generated content, and integrated Cloudinary for scalable image storage and delivery.

Awards & Certifications

- Machine Learning with Python – Coursera (2025)
- Artificial Intelligence with Python – Coursera (2025)
- Cyber Security Certificate – Coursera (2026)

Education

B.Tech in Computer Science & Engineering

Vivekananda Global University, Jaipur, Rajasthan

Expected Graduation: 2027

CGPA: 7.83
